HTML | CSS/SASS | JavaScript | Node.js | React | Django | ASP.NET | JSON | AEM | ORM | Regex | Express
TypeScript | Express | MySQL | MongoDB | Python | Git | JQuery | AJAX | Material-UI

PROJECTS

Company Intranet | Project was for internal company use

- Created a company wide Intranet by utilizing Sharepoint, Material-UI which allowed employees to interact and stay connected. This simultaneously increased employee engagement and company alignment by providing employees a "one stop shop" for tools, contacts, and resources to empower employees to flourish within their job function
- Tech:** HTML | CSS | JavaScript | Sharepoint | Azure | ADP API | Material-UI

Spotify Analytic Software | Software is currently in beta

- An innovative tool that utilizes proprietary song recommendation algorithms, playlist building AI, and song comparison tools to elevate and enable Spotify users music discovery and listening experience.
- Tech:** AWS | React.js | Django | JavaScript | Python | Redux.js | Git

E-Commerce Site | <https://github.com/ImMythz/Stolen-Canvas> | <https://bit.ly/3nG3H0t>

A web application is a full-fledged E-Commerce site that is based on the premise of pseudo-selling famous pieces of art as well as MS Paint drawing from the creators of the site.

- Tech:** HTML | CSS | JavaScript | Node.js | Express | MySQL | Sequelize | Handlebars | Bcrypt

EXPERIENCE

Front End Developer

12/2019 - Present

Infinite Electronics; Lewisville, TX (Remote)

Developed and maintained company web applications across 14 brands utilizing AEM, ASP.NET, Javascript, HTML, and SASS. Streamlined and optimized company web properties to ensure industry standard SEO best practices. Spearheaded the implementation of a company Intranet by utilizing Sharepoint, Material-UI and the ADP API. This allowed employees across the organization to interact and stay connected. The company intranet simultaneously increased employee engagement and company alignment by providing employees a "one stop shop" for tools, contacts, and resources to empower employees to flourish within their job function. Maintained legacy Wordpress, ASP.NET Storefront sites, as well as implemented AEM across company brands.

- Tech:** AEM | SASS | JavaScript | ASP.NET | C# | WordPress | BlueConics | SharePoint | Material-UI

Software Developer

10/2021 - Present

Vibes for Spotify; Dallas, TX (Remote)

Creating and developing an innovative tool that revolutionizes the way Spotify users discover, explore, and analyze their Spotify music. Leveraging tools such as Django, React, AWS, Git, and Redux; powered by Python and JavaScript. Developing a song recommendation algorithm, playlist building AI, and song comparison tools to elevate and enable Spotify users music discovery and listening experience.

- Tech:** AWS | React.js | Django | JavaScript | Python | Redux.js | Git
